

XXXX.XXXX, Pekna cesta 45, Nitra, Slovakia

To whom it may concern:

Dear Sir/madam,

My name is XXXX XXXXXXXX, I am 18 years old. I am studying at 8-year grammar-school in Nova Dubnica (Slovakia). My graduation is in May 2011. I would like to apply for AP Degree at UCN in Design – graphics.

I have visited Denmark for two times up to now and was surprised by everything-nice people, beautiful architecture, amazing design, loads of bicycles and the atmosphere of the country, too.

I would like to study in Denmark and at your university, because I think it is the right place to study this field of study. It would be a great experience for me to study in the metropolis of the design and architecture.

I am interested in travelling, meeting new people, drawing, sports, design, music and literature. I was studying English in Malta in the summer 2009 what made me more independent and improved my English a lot. I also like learning new languages, I have been learning German. If there is an opportunity to learn Danish, I will be pleased to do it.

From my point of view my life is active and full of many experiences. I was a leader of school magazine for two years, I was playing basketball for 3 years and I have been attending art classes for 4 years. During my studies I was a member of student parliament, which involved the most organizing school parties and balls. This march I started to train a martial art Aikido, it is a good way how to defence especially for women.

I would like to use my creativity in study and to be taught how to do my best in this field. I find studying at your university the best way to have the successful future and career. I consider it as a great chance to change my life into better.

Looking forward to hearing you.

Very regards

XXXX XXXXX
